Re: Sanitary Landfill Permit #197245
Chicago Heights, Illinois

Dear Mr. Clark:

We are requesting a supplementary permit for the above subject landfill to receive liquids from Certain-Teed Products Corp., Chicago Heights, Illinois.

Attached is a letter received from Certain-Teed which lists the components which make up this liquid. The material is to be brought to our site by Porter Waters Sanitary Service, Homewood, Illinois and will be mixed daily with other refuse.

They are very anxious to begin disposing of this liquid in our landfill, however, we informed them before they could start disposing of this material we would want a supplementary permit from the Environmental Protection Agency granting us permission to do so.

We would very much appreciate your taking prompt action on this.

Yours very truly,

INDUSTRIAL BUILDING OPERATIONS

Leonard A. Swanson

10th and State Streets, Chicago Heights, Ill. 60411 312/757-5300

RECEIVED

February 24, 1975

Subject: Percent Water in Condensate

TO WHOM IT MAY CONCERN:

Sample of still condensate from the thermal oxidizer taken February 22, 1975 contains 55.7% water and 44.3% residual light oil (not asphalt). There could be a day-to-day variation, based on past tests, from 50% to 60% water. This is an oil water emulsion.

K. Foster, Plant Chemist
CERTAIN-TEED PRODUCTS CORPORATION

We wish to bring a maximum of seven (7) loads per week, at 1100 gallons per load, of the above solution, into Industrial Building Operation landfill site located at Chicago Heights, Illinois.
